CRITICAL WARRIOR

## EXECUTIVE OVERVIEW

Critical warrior is a Metaverse MMORPG game built on the binance network. The game is based on a very popular platform: Binance Smart Chain. With the player's Critical Warrior control soldiers in war.

In the game, players engage in thrilling battles and discover completely new environment -! players engage in fierce battles, kill troops with the given super strength, and generates Critical warrior and NFT. In addition, players can transfer in-game NFT to NFT outside the game. This transfer allows trading, staking and farming for Critical Warriors.

This action to increase revenue. With the combination of NFT and DeFi, users can collect income while having fun self! Critical warrior is built with the Unreal Engine. That is, players will enjoy 3D visuals, advanced interactive effects with high visual quality and smooth motion, all combined with artificial intelligence (AI) to control the actions of dragon characters in the game. Critical Warrior connects millions of players from all over the world. Equipped with variety ecosystem and provide opportunities to play for money.

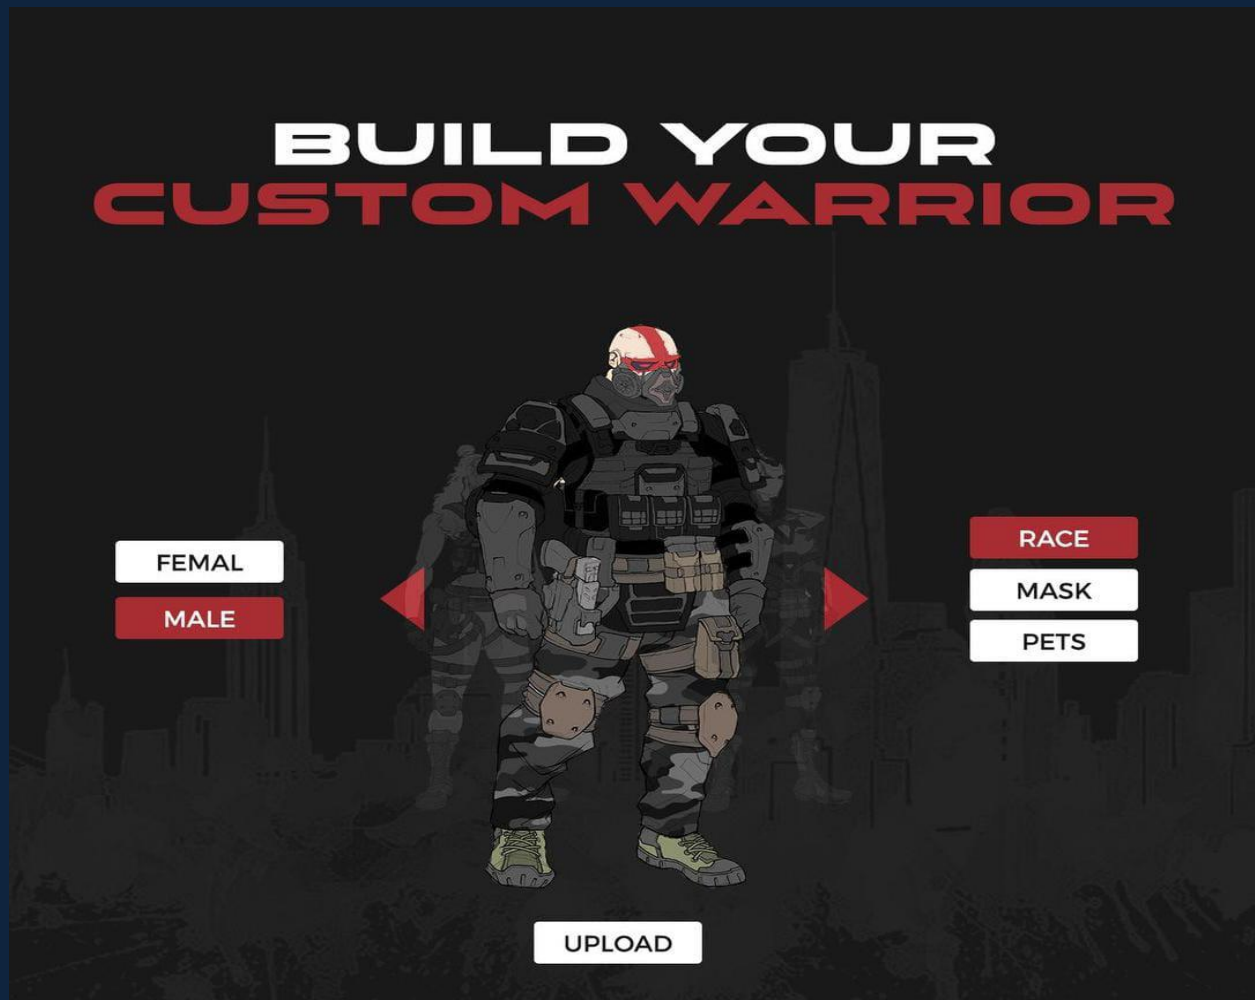

## GAMEPLAY

Enter the arena and join the battle. Players fight alone or with teammates. Bet bet on the outcome. Use your talents and skills to conquer opponents and earn SB tokens.

- *Map:* Battle in three modes: 1:1, 2:2, or 3:3. Whoever wins the battle will receive opponent bet.
- *Character:* Before fighting, players will choose a Critical warrior avatar. Each type of avatar will have strengths and weaknesses. Choose the dragon you want to control and fight against the opponent.
- *Battle:* Choose your battle. The system is set to automatically search and match player with a matched opponent.
- *Rewards:* Being a winner in a battle means your reward is a lot of tokens in bet.

## NFT Marketplace

All in-game items can be transferred out of the game for trading and vice versa. When a player buy Critical warrior items from any NFT market, can be easily imported and used in game. Players create valuable items by playing games to sell to the market. Other players may want to have strong warriors without spending time playing game. In this situation, players can purchase combat-ready avatars via NFT market and import into the game.
